EC601 Mini Project User Stories

Application Name: **PoppyTweets**

MVP:
> "I, as a cinema owner, should be able to see which movie receives the most good comments among all our currently showing movies, and change our showing schedule accordingly."

User Stories:
> (user stories that are marked with "*" are the relevant ones on our target group.)

*I, as a cinema owner, should be able to see at what time of the week that the least amount of people come to our cinema, so that we could make promotions of tickets on that day.

*I, as a cinema owner, should be able to see which movie receives the most good comments among all our currently showing movies, and change our showing schedule accordingly.

*I, as a cinema owner, should be able to see which size of the popcorn is the most popular among our customers.

*I, as a cinema owner, should be able to see how emotionally (if they cried) our customers react to the movie, so that we could provide some accessories, such as napkins for them in advance.

*I, as a cinema owner, should be able to see how good the feedback is of our cinema services from our customers, and make improvements if necessary.

I, as a transportation organizer, wanted to know if the new road construction bothers a lot of people.

I, as a restaurant owner, wants to see if customers have positive feedback on our newest menu, so that I could make modifications if necessary.

I, as a restaurant owner, wants to see if our customers like a brunch dish so much that we could add it into our dinner menu.

I,as a restaurant owner, should be able to see the ranking of the most good comments received of our dishes.

I, as the university academic registrar officer, am able to see the list of classes that students think that are too hard to take.

I, as the cinema administrative officer, should be able to get parents' comments about whether the movie is suitable for children to watch.

I, as a representative of an entertainment company, wants to know where those people who react positively about our artists' new album are from.

I, as an advertiser in a company, wants to know the performance of our new products and then compare it to our old products. Also, I want to know the most popular feature among these products.
